

ENRICHMENT PROGRAM

Cambridge Primary School are proud to offer an 'Enrichment Program' for year 4 to 6 students who achieve outstanding results and demonstrate exceptional ability in English and Mathematics.

Students in the Enrichment Program will undertake a learning program that will differ from mainstream classes and is tailored to accommodate students learning at a higher level. Students will access a curriculum that is suitably paced, intellectually challenging and future focussed. They will develop skills to assist them with becoming responsible, empathetic and contributing citizens, ready to face and embrace the possibilities and demands of the fast approaching fifth industrial revolution. Student outcomes, assessments, grading and reporting will be modified to ensure there are suitable opportunities to show evidence of creative, critical and deeper learning. Students who have an exemplary work ethic, are organised, diligent, persistent and motivated are ideal candidates for the Enrichment Program.

Please note: Entry to the program is via a testing and selection process. Interested students will be required to apply and test for the program each year to secure a place for the following year.

For more information please contact Michelle Meracis (Learning Enrichment Leader) through the school office.
